Describe the present and original (if known) physical appearance

The Carnegie Library was constructed on the south side of Eighth Street between Harris and Douty Streets in the City of Hanford, California, as a free-standing, two-story Romanesque style public library, L-shaped in plan. A half-submerged cement-floored basement supports an elevated main floor on foundation walls of concrete block cast in a simulated stone pattern resembling rough quarried granite. Most of the square or rectangular basement windows are barred or screened for security purposes.

A slightly flared concrete buttress band at eye level completely encircles the building, separating the thick basement walls from the thinner, smoother concrete block walls of the upper stories. The most prominent feature of the upper walls on the north, south, and west sides is a series of arched windows, each topped by a wide arched cast-concrete molding. Other arched panels in the roof dormers and gables on the north, south, and west sides contain attic ventilation louvers. Windows are predominantly double-hung with wooden frames and two sashes. The upper sash of many of the windows on the north, south, and west sides are divided into nine gracefully-curved sections by thin wooden strips. All windows have a single-paned bottom sash.

The main entry is through an alcove identical in appearance to four heavy arched window openings to its right; this entry arch is located at the base of a square, two-story, free-standing tower in the inner corner of the "L". The recessed rectangular wooden entry door is paneled on the lower half, with a single rectangular glass panel above. A plaque commemmorating the building's construction date appears on the base of the arch to the right of the doorway. Entry stairs are of concrete with a heavy, two-stepped, capped railing; the left of the two railings abuts the adjacent wall, while the right is free-standing. A heavy metal pipe railing stands in the center of the stairs.

The only alterations to the building's exterior appearance over the years have involved the addition of an air conditioning unit resting unobtrusively on the ground on the west side, with pipes entering a basement window opening; and a single rear entry door and stairs on the south side of the building. This entry was created by cutting the middle window in a grouping of three unadorned, tall, narrow, double-hung, two-sash windows down to floor level, about one foot below the flared buttress band separating upper walls from basement walls. A flat, solid wooden door and canvas awning were installed, with a modern steel-frame staircase with concrete treads, no risers, and wrought iron railings leading to ground level. This alteration is not visible from the street.

The steep-pitched roof is of pressed metal molded in a pattern resembling clay tile.

The interior is little changed from its original state. The first-floor main hall is topped by the original vaulted ceiling with exposed wooden beams; original moldings, wainscoting, doors, and windows are intact. Original door knobs, hinges, locks, and other accessory features are in use. The original staircase leading to the vaulted-ceiling upstairs gallery is intact; and several of the original combination gas-and-electric light fixtures remain in place.

Exterior features of interest include the top of the original hitching post, in the shape of a man's head, located at the inner edge of the front sidewalk; and a rear garden with mature shade trees.

Statement of Significance (in one paragraph)

The Hanford Carnegie Library is one of a nationwide series of philanthropic library construction projects funded by Scottish-American industrialist Andrew Carnegie (1835-1919). It served as the community's library from 1905 to 1971. The structure is notable not only in the social/humanitarian context, but also for its architectural merits, judged both on its own and as a key component of a downtown unusually rich in historic buildings. It is an excellent example of its type and period; this small, sophisticated Romanesque library building has survived virtually unaltered. It was designed by the McDougall Brothers, Benjamin and George, of Fresno just prior to moving their architectural practice to San Francisco in 1906.

The architectural significance of the building has been noted by Gebhard and Winter in A Guide to Architecture in Los Angeles and Southern California as follows:

"Without question, the most sophisticatedly-designed Carnegie library in the state. It is enhanced by a cut finished stone (sic) version of the Romanesque with a small square tower snuggled in between the body of the building and the north projecting wing. The ornament is sparse but fine. The building is presently being converted to non-library use."

At least two other San Joaquin Valley structures designed by a McDougall brother have been nominated to the National Register of Historic Places. Benjamin McDougall's 1911 Maubridge Apartments in Fresno was approved for nomination on November 14, 1980; George McDougall's Administration Building for the Fresno State Normal School (1915) was listed on May 1, 1974. It is also of note that George McDougall was named California State Architect in 1913, a post he held until 1938.

Constructed by builder David Gamble, the building has been an important local landmark for the past 76 years. The cornerstone was laid on August 12, 1905, beginning 66 years of uninterrupted service as Hanford's only public library and qualifying it as the oldest operating city institution until 1971, when its threatened demolition was averted by changing its function to that of a museum.

Excerpt of Hanford City Council Minutes - April 21, 1981;
IN THE MATTER OF APPROVING:

Hanford Carnegie Museum, Request for Resolution or Letter Supporting Placement of the Museum on the National Register of Historic Monuments

Mr. Dan Humason, member of the Carnegie Museum Board of Directors, stated the Board is preparing an application for placement of the Museum on the National Register of Historic Monuments. The deadline for submittal of the application is May 8, 1981. Mr. Humason requested the Council either adopt a resolution or have a letter prepared supporting this application.

Motion was made by Councilman CRAIN, seconded by Councilman NICKLAS, that the staff be directed to prepare a resolution supporting the Carnegie Museum application, and have the Mayor sign for immediate forwarding to the Carnegie Museum. Motion carried unanimously."

I HEREBY CERTIFY that the above order was passed and adopted on April 21, 1981	
by the following vote of the Hanford City Council, to wit:
